

Since its beginnings in Hamamatsu, Japan, in 1920, Suzuki Motor Corporation has been committed to distributing and manufacturing innovative, high-quality products for people in motion. Our automotive products address practically every market from rugged off-road trucks to smooth-running sedans and wagons. For those with a taste for more of life's adventures, Suzuki motorcycles and ATVs can take you across the country or help you negotiate a narrow, twisting forest trail. And for fresh or salt water fans, Suzuki marine products will power a fishing trip, diving expedition or just a relaxing cruise. Wet, dry or muddy, Suzuki products will help power your needs for motion.

AERIO

A cubic feat.

You'll probably run out of stuff before it runs out of storage.

[FEATURES] If your space requirements run in the direction of blimps, consider the Aerie SX. It has over 63 cubic feet of cargo

volume and a whopping 103.6 cubic feet of total interior volume. That's a lot of room for your snowboarding gear, stereo equipment or a couple of giant slobbering dogs. With its flip-and-fold seats,¹ the rear cargo area transforms into a cavernous hangar with a flat load floor that can handle long or bulky items. And because the rear hatch opening is designed to be wide and tall, getting your cargo in and out is easy. Sedan models also feature split-folding rear seats² for long cargo. But if that's not enough, Aerie SX provides several separate below-floor storage trays³ and bins for small cargo items. In GS and SX models, you'll also find a convenient passenger-side under-seat storage tray⁴

for items you might need access to along the way. When you're not carrying cargo, rear passengers in GS and SX models will appreciate the standard rear seat center armrest with a built-in cupholder.⁵ All models also feature a front console with two cupholders. With all this space to utilize, you may just have to go and get more stuff.
